Maritime, Fluvial and Port Activity Services

ARGENTINA URUGUAY PARAGUAY

About Us

Servicios Marítimos is a group of companies dedicated to port, river and maritime activities, with more than 25 years of experience in Argentina, Brazil, Paraguay and Uruguay.

The company was founded in 1983. Soon it began to offer services in the ports of Bahía Blanca and Puerto Deseado, in Argentina.

Years later, the pilot transfer service began to be offered throughout the Río de la Plata, from Recalada to the Port of Buenos Aires. The first vessels were purchased abroad, but then we began to build boats in various shipyards in Argentina, betting on local labor and making significant investments in the country. Soon, the service was extended to several ports of the Paraná River, in Argentina. The next step was to offer Pilotage Services to all type off ships, adding to our group the contribution of experienced captains. These services are provided in all the ports of Argentina, especially in the Río de La Plata and Río Paraná.

Reinforcing the commitment to invest in the country, the group began offering Tug Services in the Port of Buenos Aires and Bahía Blanca. These boats also offered an innovative fire extinguishing service, which showed the group's commitment on creating a safer work environment. From 1998 to 2000, the company built 3 container barges and began offering a Feeder Service between the ports of the Paraná River, Buenos Aires and Montevideo, in Uruguay. This service grew significantly and shortly after we incorporated new vessels and too offer services in Brazil and Paraguay. The group is now the largest container transport company in Río Paraguay, Paraná and Río de la Plata. Our commitment to growth continues day by day. At the moment we are building 2 vessels to add to our group: a 10,000 m3 tanker Imo II and a 800 teus maritime container ship. The last bet of the group was the creation of the Salvage Division, providing assistance to hundreds of vessels in emergency situations in both Río Paraná and Río de la Plata.

Salvage

Vessel Salvage is the salvage and underwater tasks division of Servicios Marítimos Group, which has been operating in Argentina since 2014, and has the support of all the companies in the group.

Our staff possess the knowledge and experience in all the businesses related to operations in both Fluvial and Maritime issues, in Argentina, Uruguay and Paraguay.

We count on overseas captains, pilots, naval experts in rescue and diving, naval experts in pollution prevention and spills controls, engineers, shipping agents, specialists on documentation, port operators, and

accounting and financial assistants.

Our work is supported by more than 100 assistance operations, among which can be mentioned:

- Maneuvering assistance
- Agroundings
- Rescue
- Offshore and Subaquatic tasks
- Joint operations with tugs of other companies.
